Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. The claims are objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood: it is unclear if the Applicant has provided one claim with seven parts or seven separate claims.

Applicant is required to submit an amendment which clarifies the claims so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.

2. The examiner has provided the following examples of claims to assist the Applicant in drafting acceptable claims:

1) A device that uses electrostatic and magnetic fields to produce motion comprising a motivator and a target, where said device includes a means for inducing an electric and magnetic field in said motivator and said target, said means for inducing an electric field including a means to induce an electric charge within a conductive mass to polarize the mass by burying dielectrically insulated high voltage emitters within said mass, and a means to assist said polarizing of said conductive mass with a low voltage field, where the fields

Art Unit: 2834

induced in said target by said motivator will be attracted and/or repelled by said motivator.

OR

1) A device that uses electrostatic and magnetic fields to produce motion comprising a motivator and a target.

2) The device of Claim 1, including a means for inducing an electric and magnetic field in said motivator and said target.

3) The device of Claim 2, where said means for inducing an electric field including a means to induce an electric charge within a conductive mass to polarize the mass by burying dielectrically insulated high voltage emitters within said mass.

4) The device of Claim 3, including a means to assist said polarizing of said conductive mass with a low voltage field, where the fields induced in said target by said motivator will be attracted and/or repelled by said motivator.

The examiner has not considered the above claims in regards to the statutory requirements for obtaining a patent. The examiner has merely repeated the Applicant's original claims as a single claim and as dependent claims, as best understood by the examiner. The Applicant should consult the MPEP 714 regarding the manner and form of making amendments to the claims and the specification.

3. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai at (703) 305-7066.

The examiner can be normally contacted on Monday through Friday from 8:00 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Nestor Ramirez, can be reached at (703)308-1371. The facsimile number for the Group is (703)305-3432.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist at (703) 308-0956.
